EDUCATION

Georgia Institute of Technology, *Atlanta, GA* May 2027
Bachelor of Science in Computer Science *Concentration: Cybersecurity & Intelligence*
John H. Martinson Honors College *Minor: FinTech*

RELEVANT TECHNICAL SKILLS

Computing Languages and Technologies – Java, JavaScript, C, C++, C#, Python, AWS, Windows, Unix, MATHLAB
Database Technologies - SQL, PL/SQL, Oracle, MySQL
Web Development – XHTML, CSS, JavaScript, AJAX, Dojo, jQuery, PHP, APEX, XML, XSL

WORK EXPERIENCE

Google, *Mountain View, CA — Software Engineering Intern* May 2025 – Aug 2025

- Engineered and launched a new "Instant Cart" feature for child accounts, enabling secure, one-click checkout for users without a registered payment method and improving overall checkout experience.
- Collaborated with product, design, and backend teams to integrate parent-linked payment authorization, ensuring seamless functionality and compliance with family account policies.
- Achieved a 36% reduction in latency and improved deployment efficiency, resulting in faster checkout performance and increased user satisfaction.

Georgia Tech School of Materials Science and Engineering, *Atlanta, GA – Student Assistant* Nov 2024 – Present

- Managed and organized large sets of student and departmental records using digital systems, ensuring data accuracy, integrity, and compliance with institutional policies.
- Streamlined administrative workflows by identifying inefficiencies and implementing digital tools to improve turnaround time and reduce errors.
- Gained experience handling confidential and sensitive information, reenforcing knowledge of data privacy, access control, and professional discretion.

PROJECTS

Dungeons and Dragons Engine, *Atlanta GA – Personal Project* Aug 2025 – May 2025

- Developed an interactive web interface for a Dungeons & Dragons campaign, enabling players to manage character stats, spellcasting, and combat tracking in real time.
- Integrated data persistence and automation (e.g. dice rolls, health updates, inventory management) using JavaScript and a backend database to streamline gameplay.
- Collaborated with players to design an intuitive UI/UX, improving accessibility and reducing session set up time by over 50%

Networking Project, *Conyers GA – Class Project* Mar 2024

- Designed and simulated a secure model network for a mid-size company, incorporating subnetting, VLAN segmentation, and routing protocols to ensure efficient traffic flow scalability.
- Configured core networking devices (routers, switches, firewalls) to support internal departments and external connections, optimizing bandwidth utilization and minimizing latency.
- Implemented security and redundancy measures such as ACLs, DHCP, DNS, and failover routing to maintain uptime and protect against unauthorized access.

LEADERSHIP AND COMMUNITY ENGAGEMENT

GreyHat Club, *Atlanta, GA – Student Member* Aug 2024 – Present

- Active member of the GreyHat Cybersecurity Club, participating in ethical hacking labs, capture-the-flag (CTF) competitions, and vulnerability analysis exercises.
- Collaborated with peers to proactive penetration testing, network forensics, and secure coding techniques in simulated enterprise environments.
- Contributes to workshops on threat detection, social engineering prevention, and system hardening, hardening, and enhancing hands-on security skills.

Valkyries Youth Rugby Team, *Atlanta, GA – Coach* Aug 2025- Present

- Served as a Youth Rugby Coach, mentoring player ages 8 – 14 in teamwork, discipline, and sportsmanship while fostering a positive and inclusive environment for skill development.
- Designed and led training sessions that build core fundamentals such as tackling, passing, and positional awareness, improving player confidence, and team performance.
- Provided individualized feedback and goal-oriented guidance to help players progress both athletically and personally.
